

WHY GRIP IS DANGEROUS.

It is an Epidemic Catarrhal Fever Caused by a Bacillus that Generally Leaves the Patient Weak After the Acute Stage Has Passed.

Grip Patients Grateful to Peruna, the Expectant Tonic.

Do not make the error of regarding Grip as an exaggerated cold. There is a big difference between the two. Grip is an epidemic disease that poisons the vital organs. When a person has grip, the air passages are alive with millions of bacilli poisoning the blood. The infected person feels tired and exhausted.

Peruna is a Tonic Laxative. It requires a good tonic laxative to keep the body of the patient as strong as possible to counteract the effect of the poisons created by the grip bacillus. An expectant tonic with some laxative qualities is the safest remedy. Such is Peruna. Beware especially of coal tar powders or tablets because they lessen the vitality of the patient.

There is no specific for the grip. Peruna has been used with good success in former grip epidemics. Indications point to the return of grip this winter.

Do not fail to read the experience of former grip patients with Peruna. Mrs. Gentry Gates, 8219 First Ave., East Lake, Ala., writes: "I had a bad case of grip. I tried Peruna and it cured me. I can safely say it is a fine medicine."

Mrs. Charles E. Wells, Sr., 239 South St., Delaware, Ohio, writes: "After a severe attack of la grippe I took Peruna and found it a good tonic."

CALLS FOR WORK OF EXPERT

City Once Properly Laid Out, Residents May Be Trusted to Develop and Beautify It.

A movement of the first importance and of great proportions is taking place among American cities, which, while it has not attracted any very marked degree of attention on the part of the general public, is yet one which will have lasting consequences of the most beneficial character, writes author of "American City Planning," "Modern City Planning and Maintenance."

This movement, the replanning of cities, has only begun to take shape in this country in the last few years, but already great progress has been made, and plans of the most elaborate and magnificent character have been proposed.

The subject is one of such importance in the social, aesthetic and practical betterment of cities that it is of vital interest not only to the city administrator, the engineer and the architect, but also to every citizen who has the advancement of his city's welfare at heart.

The work of the expert is to supervise the whole undertaking, to conceive the design and develop the plan; to direct the work of the engineering staff and that of the office as well. He is the directing head of the whole undertaking, and working in harmony with the commission, should have a free hand to develop the best possible plan. In cases where more than one solution of the problem of the city's replanning is practicable, he should submit tentative plans for the further consideration of the commission and the public.

When the work of the expert has been completed a public exhibition should be held of the drawings and the plans and they should be subjected to the criticism of the public at large and discussed in public meetings and in the press.

The commission should then decide upon the plan to be adopted and the work then should be actually undertaken.

SAVE MONEY FOR TAXPAYERS

English Cities Draw Revenue From Exploitation of Municipal Property or Some Points of Interest.

Norwich, Eng., has converted the Norman keep of her castle into one of the finest museums in the country, and makes it minister in a small way to her rates; while the famous and beautiful Valley Bridge at Scarborough yields a yearly profit of about \$10,000 to the corporation for various town purposes. For a whole century Plymouth has been owner of the Theatre Royal, ever since its foundation, was laid by Mayor Lockyer in 1811, and its lease reduces the rates by considerably over \$5,000 a year.

The ratepayers of Birkenhead owe much relief to the famous ferry across the Mersey to Liverpool. It owns a fleet of many steamers, which, as carriers of goods and passengers, contribute, it is said, something like \$60,000 a year to the municipal exchequer; the contribution to the rates during the last half-century falling little short of half a million pounds. Liverpool makes from \$15,000 to \$20,000 by the annual exhibition of pictures in the Walker Art gallery. Already it is claimed that more than \$5,000,000 has gone to the city funds from this source alone, in addition to the profits made in other directions, such as electric works and the manufacture of concrete slabs for paving purposes. In fact, Liverpool is credited with making well over \$500,000 a year by its various enterprises.

Physical City Conferences.

Mankind is every day becoming more cosmopolitan, and perhaps a significant indication of this is to be seen in the number of congresses, both national and international, that have recently been held. In connection with town planning and its allied subjects there have been held this year an international town planning congress at Ghent, an international road congress, an international housing congress, and an international congress of architects, and, in addition, important congresses on housing and town planning both in London and several provincial towns held under the auspices of the National Housing Reform council, an important congress in town planning held under the auspices of the engineers at Norwich, and also a sanitary congress. This national and international handshaking is certainly of the utmost value in co-ordinating the work of experts.

Ideal Houses for Poorer Classes.

In Huddersfield, England, the borough council has decided to erect 357 houses for the laboring classes. These houses will be erected in different localities, easy of access, and in districts where good light and air as well as good sanitary conditions can be had.

Equal Suffrage.

Equal suffrage prevails in Mexico to a large extent. The women are not permitted to vote and the men are afraid to—Kansas City Journal.

Destroying Dangerous Animals.

Many wild animals are destroyed every year in India. The following list is for Bengal in 1912, three wild elephants, 132 tigers, 327 leopards, 26 bears, 13 wolves, 2 hyenas and 1,604 other wild animals, besides 12,674 snakes, and Rs. 13,477 was spent by the government in rewards for their destruction.

Daily Thought.

We are all born for love. . . It is the principle of existence and its only end.—Disraeli.

LURE OF LOG CABIN

Rich Philadelphians Show Preference for Structures.

John T. Morris of Quaker City Seeks Quietness and Seclusion in One on His Estate at Chestnut Hill—Others Do Likewise.

Philadelphia.—The boyish fancy for building a log cabin and playing Indian is being exemplified in children of a larger growth. On many of the estates of rich men log cabins are being built. Thus in a secluded corner of the estate of John T. Morris at Chestnut Hill, Philadelphia, a tiny log cabin has been erected.

The interior consists of only one small room, neatly furnished in conventional log cabin style, with a Navajo blanket on the floor and a few simple articles of furniture. Here the owner of the mansion and its big grounds retires to read when he has a fancy for complete isolation.

A little rustic bridge leads across a brook in front of the little cabin, and in fine weather the owner of the cabin can sit on a tiny porch and listen to the rippling water and be happy in complete seclusion and quietude.

Wealthy Man's Log House.

etude, far from the big house and free from the annoyance of such modern demons of unrest as the telephone.

Another log cabin has been erected on the estate of W. H. Newbold in one of the suburbs of Philadelphia. This is a more pretentious structure than that of Mr. Morris. It is modeled after the log cabins that sheltered the patriots at Valley Forge.

The floor is well waxed for dancing and there is little furniture except the settees around the wall. A feature is an immense fireplace for the burning of logs. A more interesting place for a country house jollification can scarcely be imagined.

BIG FLEET OF DIRIGIBLES

German Inventor Would Carry 300 Passengers Across the Atlantic in Sixty Hours.

Vienna.—The German airship inventor, A. Boerner, is here trying to raise capital to finance a line of transatlantic dirigibles each capable of carrying 300 passengers and of crossing the Atlantic in 50 hours.

French experts state that the new airship certainly is the most practicable yet designed for long voyages. The inventor says it will bring Vienna within 60 hours of New York. The ships are to be as luxurious as the Imperator, with a length of 800 feet and a width of 80. There are to be 300 cabins, dining and smoking rooms, a promenade deck, kitchens and electric lifts. Built in a semi-rigid car running the entire length of the ship will be 34 motors of 150 to 200 horse power each, so arranged that no ballast will be carried.

Engine breakdown or explosion will be theoretically impossible. Three separate gasbags in a single envelope will lift the ship. The ship will be able to make a nonstop flight of 4,000 miles at an average of 68 miles hourly, landing without external aid.

It can descend on the water, along the top of which it can travel 35 miles hourly with no danger of a wreck.

Boerner is trying to raise sufficient money to build six ships requiring \$5,000,000.

BOUND BOY TAKES TO HILL

Youth Rolls Himself Almost Back to School After Hold-Up by Bandits.

Pottsville, Pa.—The State police are investigating a queer hold-up reported to them by the school authorities. James Wentzel, a thirteen-year-old boy, while on his way to school, stood near a stable and overheard two men plotting to steal horses.

The men caught Wentzel eavesdropping and bound and gagged him, leaving him, as they supposed, helpless. Although unable to break the thongs, Wentzel was able to roll himself out of the stable, and then he allowed himself to roll down the steep Race street hill.

This loosened the ropes about his feet, and in this bound-and-gagged condition Wentzel was able to shuffle along, and presented himself to his teacher, Miss Mae Snyder, in the Jackson street building.

WASHINGTON AD IN OLD PAPER

Baltimore Publication of 1773 Says General Has 20,000 Acres for Lease.

Johnetta, Pa.—In searching among old books and newspapers which had come into his possession, I. E. Allen of this place found a copy of the first edition of the Maryland Journal and Baltimore Advertiser, dated August 28, 1773. The paper, yellow with age, contains an advertisement inserted by George Washington. The advertisement states that George Washington has obtained patent to 20,000 acres of land along the Ohio and Kanawha rivers and he offers to lease the land at "reasonable rates." Thomas Brereton, a broker, advertises that he wishes to purchase a "negro girl about twelve years old."

STATE BOOSTERS MEET SOON

Meeting of Secretaries Will Be Held at Anderson on the 16th of January.

Anderson.—There will be a meeting in Anderson of the secretaries of all the Chambers of Commerce of the state on January 16. It will be an important occasion when an effort will be made to get the secretaries together in a plan for state-wide work. A. V. Snell, secretary of the Charleston Chamber of Commerce, writes: "We also desire to have present the president of every Chamber of Commerce and Board of Trade in the State, and we hope to make Anderson the grand rallying point for all of the commercial interests of the state. Every Chamber of Commerce needs the co-operation of every other in answering questions and in meeting conditions that arise."

The local people are preparing to entertain the visiting commercial secretaries. The programme as arranged up to this time is at present: 12 M.—Meeting called to order. 12:25 P. M.—Welcome to Anderson. 12:30 to 1 P. M.—Presentation of all questions upon which united action of the state is desired. Ten minutes allowed for each discussion. 1:30 to 2:30 P. M.—Election of officers and general business. 2 to 3:30 P. M.—Lunch. Five minute talks by each secretary on what he is trying to do for his community and where he has succeeded or failed.

4 to 6 P. M.: 20 minutes, "Advertising and Misadvertising South Carolina," H. N. Clark. 20 minutes, "Traffic and Freight Rates, Co-operation," Henning. 20 minutes, "Agricultural Co-operation and Recent State Development," W. W. Long. 20 minutes, "How a Chamber of Commerce Can Promote Agricultural Development," T. M. Morgan. 20 minutes, "The Chamber of Commerce and City Government," W. K. Summer. 20 minutes, "Retail Trade Extension," Porter A. Whaley. 8 P. M.—Evening session.

Local address, "Agriculture, South Carolina's Greatest Asset," E. J. Watson. "A Chamber of Commerce: Is it Worth While?" A. S. Johnstone. "South Carolina and the Panama Canal," A. V. Snell.

The Charleston Navy Yard.

The roll of civilians employed at the Charleston navy yard at present numbers 822 men, and slightly over \$2,100 is paid out to them every day. With the starting up of the clothing factory in the near few weeks the civilian force will be increased fully 75 people, which will increase the roll to 897. Up to a year ago the number of people employed at the navy yard averaged 500, showing that the enrollment now is not far from double of what it was a year ago. The highest number of civilians ever employed at the navy yard was 915, but the fact that less than this number are now employed does not signify that less work is being done. The "weeding out" of "dead timber," it is stated, is responsible for a smaller force now employed than at the time when the roll numbered 915.

Delay Railroad Work.

Florence.—Work on the new railroad has been delayed for several days, due to lack of material and other causes. The gap between Florence and Poston has not yet been filled. The piers are about ready for the bridges across the Atlantic Coast Line road at the transfer yard, but the long spans of steel bridge have not yet been put in place, and it will probably be as late as February before this work is done.

Want Expert Over Schools.

Pointing out that an effective and responsible school administration must be taken out of politics, W. H. Hand, state high school inspector, has addressed a communication to the public, advocating that the office of state superintendent of education be taken from politics. He declares that the superintendent should be elected by the state board of education.

South Carolina Represented.

The University of South Carolina was recently represented at the International Student Volunteer conference at Kansas City.

To Increase Tax.

Spartanburg.—To increase the tax levy for Spartanburg county one-half mill in order to have an additional \$9,000 with which to better improve the county roads; a plea for the appropriation of \$8,000 to be devoted to the erection and maintenance of a hospital in Spartanburg for the special treatment of pellagria and a petition from J. West Harris that legislation be enacted whereby the county might acquire the Magnolia street school property, were some of the matters presented at the meeting.

To Plant Tobacco.

Camden.—John T. Mackey, banker and planter, issued a call for all farmers in Kershaw county interested in the planting of tobacco to meet in Camden, and as a result there is a certainty of 136 acres being planted this year, with a possibility of the acreage being increased to 150 or 175 acres. Among those contemplating planting tobacco are the most prominent farmers of the county and the average acreage of each experimental crop will be about five acres. It is believed it will prove successful.

Big Lumber Plant.

Port Mill.—The Port Mill Lumber company has about completed its building its building which is to contain a complete wood working outfit, and the machinery will be installed at an early date. This will be a valuable addition to the industries of Port Mill, as for a number of years past all finished building material has been shipped from other points. Under the management of J. J. Bates, this concern has built up a very large business in Port Mill and the surrounding territory.

WRIGLEY'S SPEARMINT

soothes your throat!

After smoking it cools your mouth—makes it moist and refreshed.

Hearburn and flatulence disappear.

Enjoy smoking more by enjoying this goody that improves your breath, teeth, appetite, and digestion.

Be SURE it's WRIGLEY'S

WRIGLEY'S SPEARMINT PEPSIN GUM

THE FLAVOR LASTS

CAUTION!

Dishonest persons are wrapping rank imitations to look like the clean, pure, healthful WRIGLEY'S. These will be offered principally by street fakirs, peddlers and candy departments of some 5 and 10 cent stores. Refuse them! Be SURE it's WRIGLEY'S.

BUY IT BY THE BOX

of most dealers—for 85 cents.

Each box contains twenty 5 cent packages.

Chew it after every meal

SLOAN'S LINIMENT

relieves rheumatism quickly. It stimulates the circulation—instantly relieves stiffness and soreness of muscles and joints. Don't rub—it penetrates.

Rheumatism Never Returned

"I am a travelling man and about one year ago I was laid up with rheumatism and could not walk. A friend recommended Sloan's Liniment and the morning after I used it my knee was all O.K. and I have never bothered me since. I always keep my Liniment in the house and carry it with me on the road."—Mr. Thomas S. Barnes, West Philadelphia, Pa.

Rheumatism Neuralgia

Stiffness Vanished

"I suffered with an awful stiffness in my legs. That night I gave my legs a good rubbing with Sloan's Liniment and believe me, next morning I could jump out of bed. I have been supplied with a bottle, ever since."—Mr. A. Moore of Manchester, N. H.

Sprained Ankle Relieved

"I was ill for a long time with a severely sprained ankle. I got a bottle of Sloan's Liniment and now I am able to be about and can walk a great deal. I write this because I think you deserve a lot of credit for putting such a fine Liniment on the market and I shall always take time to recommend Dr. Sloan's Liniment."—Mrs. Charles House of Baltimore, Md.

Sloan's Liniment gives a grateful sensation of comfort. Good for sprains, neuralgia, sore throat and toothache. Use it now.

At all Dealers, 25c., 50c. and \$1.00

Send for Sloan's free book on horses.
